

## Waste oil tank

### Standard equipment:

- Fitted with 2" camlock drainage point (direct connection to a tanker).
  - Leak detection sensor.
  - 1.5" female thread connection with cap.
- Special inlet with a lockable lid:
- Metal mesh to prevent dirt from getting inside the tank.
  - Tundish holds up to 20 l of oil, which helps avoid spillage.

### Optional equipment:

- Wireless oil level sensor with display (WatchmanSonic Plus).
